Why Does UEA Print This Salary Comparison?

UEA strongly believes in open communication to all school employees. For the past 21 years, UEA has printed a comparison of teachers' salaries from area school districts. Of all the publications UEA creates, this is by far the most popular. It allows teachers the opportunity to see how their district compares to others. It also proves to be a valuable tool that superintendents, administrators, and school boards use in determining salaries. Just like our regular newsletter, this will be distributed to over 90,000 school employees.

**Note – Numbers provided by Arlington ISD are average salaries for that year of experience.

Why Does UEA Print This Salary Comparison?

UEA strongly believes in open communication to all school employees. For the past 21 years, UEA has printed a comparison of teachers' salaries from area school districts. Of all the publications UEA creates, this is by far the most popular. It allows teachers the opportunity to see how their district compares to others. It also proves to be a valuable tool that superintendents, administrators, and school boards use in determining salaries. Just like our regular newsletter, this will be distributed to over 90,000 school employees.

**Note - Numbers provided by Arlington ISD are average salaries for that year of experience.
